

Accessories

unitron™

uTV™3

Sends sounds wirelessly from your TV to your hearing aids

uDirect™3

Delivers a direct connection to enjoy mobile phones, TV's, FM receivers and MP3 players in stereo sound, while also providing remote functionality

When is it used?

Mobile Phones, TVs, FM receivers and MP3 players

Who is it best for?

People who want to control their hearing instruments and enjoy long periods of stereo streaming from their entertainment devices, like the TV

Remote Control 2

Discreetly and easily adjust volume and switch programs for customised listening in the moment

When is it used?

In any moment or on the move

Who is it best for?

People who want more control in all listening environments

uMic

Hear companions more easily in challenging environments with this personal wireless microphone system that streams audio to both hearing instruments through the uDirect 3 or the uStream

When is it used?

Lectures, presentations, noisy restaurants and in the car

Who is it best for?

People who want to hear a single source in a challenging environment

uStream

Experience stereo sound through easy connectivity to wireless devices

When is it used?

Mobile Phones, TVs and Bluetooth® MP3 players

Who is it best for?

People who want discreet control of their hearing instruments and stereo streaming

UControl™ App

Use your smart phone to control volume, change programs, view how to videos and rate your hearing aid performance. Ask your hearing healthcare professional for more details
